

Name:

Student ID:

Experiment Topic:

(Briefly describe your experiment topic, e.g., "Investigating the relationship between the period of a simple pendulum and its length.")

Experimental Method:

(Describe in one or two sentences how you will conduct the experiment, e.g., "Use different lengths of string to suspend a pendulum, measure multiple periods, and calculate the average.")

Instruments/Equipment Used:

(List all the instruments and materials you plan to use, e.g., "stopwatch, ruler, pendulum bob, string.")
